

Manage Your Unisys MCP Media with Vertices®

With the new Vertices **MCP Automation Agent™**, you can log relevant media information into Vertices from your Unisys MCP based operating system. And then **take full advantage** of Vertices' **powerful** and **time-saving** features like:

- > **Wireless bar code scanning** for quick inventories and easy reconciliation
- > **Secure FTP transfers** of action lists showing media you send to offsite vaults
- > **Dynamic additions of file names** to make sure all relevant media is properly added to the Vertices **SQL Server** database
- > **Seamless conversion** from your **BL/LIB®** DMS II Database
- > **Custom reporting features** to meet compliance audits

Finally, One View of All Your Media!

With Vertices, the Enterprise-Wide Media Management System, you can **automatically** input **all your media** into one SQL Database from various sources including:

- > Unisys MCP
- > Computer Associates® BrightStor ARCserve® and CA-1®
- > VERITAS® NetBackup™ and Backup Exec™
- > LEGATO® NetWorker™
- > BakBone NetVault™
- > Syncsort Backup Express™
- > Hewlett Packard OpenView® Omniback II™

At last, a central system to handle all media tasks!

For more information on how Vertices can help you gain centralized control of all your media, call us toll free at **1-877-VERTICES (1-877-837-8423)** or visit us on the Web at **www.vertices.net**.
