BL/LIB® Virtual TapeServer

Your Solution for Information Lifecycle Management

B&L ASSOCIATES®

BL/LIB-Virtual TapeServer (VTS) is a comprehensive data management and backup system that combines the familiar methodology of traditional tape backups with the low cost and speeds of disk technology.

Single Point of Control.

With BL/LIB driving the VTS engine, BL/LIB-VTS also handles your data in any manner you need. From storing your data on virtual tape to archiving it to physical tapes for off-site storage—or a combination of both, BL/LIB-VTS turns your entire tape management and backup processes into a single, fluid operation.

Lower Costs. Faster Speeds. Same Outstanding Results.

With **BL/LIB-VTS**, you utilize every byte of storage space available. Gone are the days of putting 2GB of information on 300GB tapes. In fact, BL/LIB-VTS can cut media usage up to 90% or more over traditional tape backups.

And best of all, BL/LIB-VTS works with virtually any open system tape drive or library, so you are not locked into buying proprietary hardware or proprietary software to control the drive.

With BL/LIB-VTS you will:

▶ Dramatically increase the speed of backups and recoveries

▶ Significantly lower your operating expenses

▶ Streamline and centralize your entire backup operations

▶ Greatly reduce data center space for hardware and media

▶ Easily create, import, and export physical tapes to help comply with regulatory standards

Works the Way You Already Work.

Because **BL/LIB-VTS** uses an intuitive interface that emulates traditional tape backups, BL/LIB-VTS accepts and responds to commands from your host just like a typical tape drive, virtually eliminating compatibility issues and reducing training times for personnel.

More Storage. More Protection.

With BL/LIB-VTS' optional modules, you'll be able to increase storage capacity even more and ensure instantaneous disaster recovery.

▶ **DR Module**
Initiate and transfer data from one VTS to another in order to maintain up-to-date, identical copies of the backup data so recovery takes hours, not days.

▶ **Data Compression Module**
Compress data "on the fly" and save even more storage space-up to 85%.

Call Today for More Information.

Don't live with the "necessary evil" of tape backups a second longer.
Call B&L today and find out how BL/LIB-Virtual TapeServer can save you time, money, and peace of mind.
